

Research Scientist

Overview

The Department of Data Science at the Dana-Farber Cancer Institute (DFCI) seeks candidates with a strong background in statistics, machine learning, or computational biology for research positions. The successful candidate will have a unique opportunity to collaborate both with basic scientists and biomedical researchers at DFCI, as well as with faculty across Harvard. The successful candidate will be based in the Department of Data Science at DFCI with a proposed Research Scientist track appointment in the Department of Biostatistics at the Harvard T.H. Chan School of Public Health. This is a non-tenure track position at DFCI, but it provides similar salaries to tenure track faculty, independence to choose projects, grant submission support, and the opportunity to hire and supervise a research team. The high demand for your talents will give you the opportunity to choose among many cutting-edge research projects in need of collaborators. The position also permits seeking external and internal funding for independent projects.

The [Department of Data Science](#) at the Dana-Farber Cancer Institute offers exceptional collaborative environment with experts in a wide range of areas including clinical trials, cancer genetics, immunology, epigenetics, machine learning, statistical software development, Bayesian methods, and alignment algorithms. Background

Located in Boston and the surrounding communities and a teaching affiliate of Harvard, Dana-Farber Cancer Institute brings together world renowned clinicians, innovative researchers and dedicated professionals, allies in the common mission of conquering cancer, HIV/AIDS and related diseases. Combining extremely talented people with the best technologies in a genuinely positive environment, we provide compassionate and comprehensive care to patients of all ages; we conduct research that advances treatment and disease knowledge; we educate tomorrow's physicians and researchers; we reach out to underserved members of our community; and we work with renowned partners, including other Harvard Medical School-affiliated hospitals.

At Dana-Farber Cancer Institute, we work every day to create an innovative, caring, and inclusive environment where every patient, family, and staff member feels they belong. As relentless as we are in our mission to reduce the burden of cancer for all, we are equally committed to diversifying our faculty and staff. Cancer knows no boundaries and when it comes to hiring the most dedicated and diverse professionals, neither do we. If working in this kind of organization inspires you, we encourage you to apply.

Dana-Farber Cancer Institute is an equal opportunity employer and affirms the right of every qualified applicant to receive consideration for employment without regard to race, color, religion, sex, gender identity or expression, national origin, sexual orientation, genetic information, disability, age, ancestry, military service, protected veteran status, or other groups as protected by law.

The Harvard T.H. Chan School of Public Health seeks to find, develop, promote, and retain the world's best scholars. We are committed to upholding the values of diversity, equity, and inclusion in our school and the communities we serve.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
